SUMMARY

A software engineer with experience building modern web applications and custom software solutions for clients. Proficient in deploying applications to cloud-based servers and well-versed in the project management lifecycle. Looking to contribute long-term organizational value through my knowledge of various programming technologies. Passionate about working in a collaborative environment to create meaningful applications and solve programming challenges that benefit the end user.

EXPERIENCE

Software Engineer

Passport

📅 01/2022 - Ongoing 📍 Charlotte, NC (Remote)

- Delivers product features for the Permits team using React, Node, and AWS cloud computing tools such as Lambda and DynamoDB.
- Utilizes test driven development to build functional solutions for requested software features.
- Works on an agile development team that defines, evaluates, prioritizes, and completes user stories in 2-week sprints.

Software Development Manager

MacguyverTech

📅 07/2021 - 01/2022 📍 Glenolden, PA

- Mapped out daily and weekly tasks for the development team and oversaw multiple client projects throughout their lifecycles.
- Developed a more efficient process to deploy applications on to cloud-based servers.
- Established an improved onboarding process to help new developers better assimilate to the company's code base and development practices.

Software Developer

MacguyverTech

📅 07/2020 - 07/2021 📍 Glenolden, PA

- Delivered performance-driven and user-centric websites that met all business requirements.
- Implemented enhancements to existing applications that fixed errors and improved applications functionality and speed.
- Built and documented RESTful APIs.
